Excellent instructor. Material was very well organised, given that so much was covered especially in two weeks. Appreciate the fact that the code (with comments) was included in the Dropbox folder as it will make it easier to revisit the material.

The lecturer provided detailed information on the topic and illustrated it with examples. The lecturer knows the topic very well and ~~adeptly~~ gave answer to any question from the students. The pace was high but together with the lab sessions and the assignments I was able to apply the concepts.

One of the best courses in methodology I ever had

The 'lab sessions' could have involved more individual support and attention. As it was now, the ~~te~~ instructor provides examples of functions on \mathbb{R} , but we do not necessarily employ those ourselves.

↳ This makes it a bit difficult to follow.

→ Otherwise, I really enjoyed the course!
